KISHORE KUMAR
FULL STACK DEVELOPER

kishore21092003@gmail.com
91-7065676082
linkedin.com/in/kishore-kumar21-
github.com/kaushal-kumar-2109

SKILLS

Concepts: Full Stack Development, APP Development (with Expo Go), CRUD Operations, Authentication, REST API.
Languages: JavaScript, Java, Python.
Frontend: React, HTML5, CSS, Bootstrap, React Native.
Backend: Node.js, Express.
Database: MongoDB, MySQL, SQLite (for offline application).
Tools: Git, GitHub, Postman, Render, Supabase.

EDUCATION

KCC Institute of Technology and Management — **Sep,2022 to Aug,2026**
B.Tech(CSE)

WHITE LEAF PUBLIC SCHOOL — **Mar,2021 to Mar,2022**
12th (Science)

ACHIEVEMENTS

1. **PUBLISH CONFRESH PAPER**
   Published a research paper in **IRE Journals**, demonstrating research and technical writing skills.

2. **FULL STACK WEB DEVELOPMENT**
   Completed a Full Stack Web Development certification from **Apna College**, gaining hands-on experience in frontend, backend, and database development.

3. **DATA ENGINEERING**
   Completed Data Engineering training from the **HCL Training Program**, gaining foundational knowledge in Python, data processing, and data engineering concepts.

SUMMARY

Full-Stack Developer with hands-on experience in building responsive web applications using React, Node.js, Express, MongoDB, and MySQL. Skilled in developing RESTful APIs, integrating frontend and backend systems, and deploying applications on Render and Netlify. Strong foundation in JavaScript and backend development with internship experience.

PROJECTS

1. **GoEvent (Event Management Application)**
   Summary: Data Synchronization Model for Offline-Capable Event Management and Automated Ticketing.
   Database: SQLLite (offline), PostSQL (online Supabase).
   Technology: React-native-expo, react-native library, Nodejs, NodeMailer.
2. **DailyShop**
   Summary: Built an e-commerce platform with an admin dashboard to track, manage, and monitor sales and user activity.
   Database: MongoDB.
   Technology: Python, Flask, Html, User Login.
3. **AirBNB (clone)**
   Summary: Developed a full-stack hotel review platform enabling users to explore hotels, view reviews, and access detailed rating information.
   Database: MongoDB.
   Technology: Nodejs, Express, Html, User Login, Cloudinary.
4. **MyPortFolio**
   Summary: Developed a full-stack dynamic portfolio website with an admin login panel, enabling easy content management, project updates, and access from multiple devices.
   Database: MongoDB.
   Technology: Nodejs, Express, Cloudinary, NodeMailer, Html, Bootstrap.
5. **Whether Web Page**
   Summary: Developed a weather web application using API integration to fetch and display real-time weather data based on user location or city input.
   Technology: React, Nodejs, Weather Api's.

WORK EXPERIENCE

NULLCLASS — **Jan,2026 to Current**
Full Stack Developer intern — **New Delhi (remote)**

- Developed APIs using Node.js and Express to support backend business logic and CRUD operations
- Integrated frontend components with backend services to improve application functionality

UNIFIED MENTOR — **Sep,2025 to Nov,2025**
Full Stack Developer intern — **New Delhi (remote)**

- Developed 8+ RESTful APIs using Node.js and Express to support backend business logic and CRUD operations
- Contributed to UI enhancements and backend logic during full-stack development tasks.
